

TANK PROTECTION PLAN

Qualifications for Plan Participation:

- Customer account is on automatic delivery
- Tank has been visually inspected and approved for coverage; if tank is inside an enclosure or inaccessible it is the customer's responsibility to provide access
- Tank size is 275 or 330 gallon capacity
- Location of tank is in basement, garage, or outside and is accessible, without obstruction
- Underground tanks are not covered
- Purchase of oil from another oil company or account termination voids this Tank Protection Plan

New Tank Installation Procedure & Exclusions:

- Obtain all permitting, including removal and installation permits
- Disconnect piping and remove old tank
- Properly dispose of tank according to Massachusetts State Fire Marshall regulations
- Install new 275 or 330 gallon tank including legs, fill & vent pipes, vent alarm, gauge and labor.
- Oil line upgrades or other code compliance requirements are not covered and billed separately
- Environmental damage caused by leakage from the tank or oil line running to the burner is not covered
- Homeowner agrees to remove any obstructions and provide clear access for removal and installation
- All work and materials guaranteed for one year from date of installation

Tank Protection Plan is automatically renewed annually in June.

Scott Energy Co., Inc. is not responsible for any environmental damage under this Plan.
